PREFACE

This publication contains summary tables of final data for characteristics of persons and dwellings enumerated in local government areas in New South Wales at the 1981 Census of Population and Housing. The twelve tables presented have been selected to give a broad picture of the personal, dwelling and labour force characteristics of the areas.

The information is contained in two parts: the first contains statistics for local government areas in the Sydney Statistical Division, Hunter Statistical Division, and the Illawarra Statistical Division; the second part contains statistics for local government areas in the balance of the State. Totals are included for the Statistical Divisions, Districts and Subdivisions within each of the two parts. In addition totals are given for the complete local government area in those cases where it is not wholly contained within one statistical area.

More detailed information is available on request from the New South Wales Office of the Australian Bureau of Statistics (for details, see Note 20 of the Explanatory Notes).

T. J. Skinner ACTING DEPUTY COMMONWEALTH STATISTICIAN

February 1983

Introduction

- 1. The local government areas (LGA's) in this publication are ordered by Statistical Districts/Subdivisions within Statistical Divisions.
- 2. For the purpose of the 1981 Census, LGA boundaries in New South Wales are those as defined at 1 January 1981.

Scope and Coverage

- The 1981 Census of Population and Housing aimed at counting every person who spent Census night, 30 June 1981, in Australia including persons on vessels in or between Australian ports, on board long-distance trains, buses or aircraft. All occupied dwellings and unoccupied private dwellings were counted. People were counted where they were on Census night, which may not be where they usually Visitors to Australia were enumerated regardless of how long ago they had arrived or how long they planned to Australian residents out of the country on Census night were excluded from the count.
- 4. Diplomatic personnel and their families are, by definition, out of the scope of the Census, as are diplomatic residences.
- 5. While every effort is made to minimise under-counting in the Census, some inevitably remains for various reasons (eg inadvertent omission of very young children, treatment of some dwellings as unoccupied when, in fact, they were occupied, and failure to find all dwellings). Refusal by householders to complete the Census Schedule is not a significant cause of under-counting.

Definitions

- 6. <u>Dwellings</u> For Census purposes, dwellings are classified into two groups: occupied and unoccupied. Occupied dwellings can be either private or non-private while unoccupied are private only.
 - a. An occupied private dwelling is defined as the premises occupied by a household on Census night

- (for definition of Household see below). A private dwelling is normally a house, flat, part of a house or even a room but it can also, under certain conditions, be a tent, houseboat or caravan It is important to remember that the Census definition of private dwelling means that the total number of dwellings may be more than the total number of known structures in any given area (see Household below). Non-private dwellings are hotels, motels, boarding houses, gaols, religious and charitable institutions, defence establishments, other communal dwellings and caravan parks.
- b. An unoccupied dwelling is a structure built specifically for living purposes and capable of being lived in but unoccupied at the time of the Census. Vacant houses, holiday houses, huts, cabins (other than seasonal workers' quarters) and houseboats are counted as unoccupied dwellings but vacant tents, garages and caravans (if not normally occupied) are not. Also included are newly completed dwellings not yet occupied; dwellings which are vacant because they are due for demotition or repair; dwellings to let: and dwellings where all members of the household were absent on Census night.
- Household For Census purposes, a 7. household is either a person living alone or a group of people living together as a single domestic unit with common eating arrangements. It is possible for more than one household to live in one house or structure. For example, a lodger who lives with a family and provides all his own food is not a member of the family's household but constitutes a separate household and completes а separate therefore householder's schedule. Because an occupied private dwelling is defined as the premises occupied by a household on Census night (see above), the number of households and the number of occupied private

dwellings is identical and the number of occupied dwellings, as defined for Census purposes, may be greater than the known number of structures.

- 8. <u>Migratory</u> Persons enumerated on board vessels in and between Australian ports, or on board long-distance trains, buses or aircraft are classified as Migratory. Such persons are not included in the population of specific LGA's but are shown as a balancing item in the population of the State.
- 9. Labour Force For the 1981 Census, the labour force was defined as:
 - a. those persons who worked during the week prior to Census night;
 - b. those who had a job from which they were temporarily absent;
 - c. those who were temporarily laid off without pay for the whole of the reference week; and
 - d. those who did not work or did not have a job but were actively looking for work.

Persons helping but not receiving wages or salary and who worked less than 15 hours in the week prior to Census night were excluded from the labour force.

10. Occupation - An occupation is defined as a collection of jobs sufficiently similar in their main tasks to be grouped under a common title for classification purposes. The occupations range over 389 possible codes which are further grouped into 73 minor groups and 11 major groups. Only employed persons are classified to an occupation.

Random Adjustment of Small Cells

11. The ABS has a policy of protecting the confidentiality of information which it receives from individuals and businesses. The number of census characteristics tabulated and the detail requested in census releases inevitably produces tables in which there are many cells with very small numbers. These may inadvertently allow the release of identifiable information, even though identifiers (such as names and addresses) are not available. It has been necessary, therefore, for the ABS to randomly adjust small non-zero cells in the more detailed tabulations. These

adjustments allow the maximum amount of detailed census data to be published.

- 12. The random adjustments are insignificant in relative terms except for numbers too small, in any case, to be of statistical significance. In addition, small numbers in the original data may be affected by such things as respondents omitting to answer particular questions or giving incorrect answers, or by the occasional error in coding or transcribing data in the course of ABS processing. No significance should be attached to cells with values of 3 or less.
- 13. The column and row totals, sub-totals and overall totals have been derived after the random adjustment process has been applied.

Geographic definitions

- 14. Local Government Areas in New South Wales are constituted under the Local Government Act, 1919, and comprise municipalities (usually centres of population) and shires (for the most part country areas embracing tracts of rural land as well as towns and villages). Twenty-nine municipalities had been proclaimed as cities as at 30 June 1981.
- 15. Statistical Division Statistical Divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and between the economic units within the region, under the unifying influence of one or more major towns or cities. The Capital City Statistical Division is predominantly urban in character and the boundary is delineated to contain the anticipated urban development of the Capital City (and associated Urban Centres) for a period of at least twenty years.
- 16. Statistical District Statistical Districts contain an Urban Centre with a population of 25,000 or more. Their boundaries, like those of Capital City Statistical Divisions, are delineated to contain the anticipated urban development of the centre for a period of at least twenty years. These fixed boundaries delineate areas which for general statistical purposes are free from the problems imposed by the moving boundaries of the majority of Urban Centres.

17. Statistical Subdivisions -

- (a) Statistical subdivisions within Sydney Statistical Division were delineated in 1976, in order to provide statistical areas of optimum assistance to users (particularly physical and social planners). The boundaries of the seven sub-divisions created within Sydney Statistical Division have been drawn to coincide with the regions formed by the former Commonwealth Department of Urban and Regional Development.
- (b) Statistical subdivisions outside Sydney Statistical Division are component areas within statistical divisions which have been delineated broadly on the basis of topographical and/or climatic features and reflect, inter alla, some degree of homogeneity of agricultural activity.

Other Information

- 18. This publication only includes summary tables for local government areas, statistical subdivisions and districts, and statistical divisions in New South Wales. However, information for a greater range of summary tables and at other geographical levels is also available for New South Wales and for other States.
- 19. An information paper : Census 81 Data Release Plans (2142.0), with an

Addendum, describes the plans for release of data, information papers and maps from the 1981 Census and is available on application.

20. If you would like further information about the statistics available from the 1981 Census, please contact your local ABS Office (in NSW - Information Services, St. Andrew's House, Sydney (Box 796 GPO, Sydney 2001); Phone 02 268 4395-6-7; Telex AA20819).

Abbreviations Used in this Publication

Aborig TS1 - Aboriginals and Torres Strait

Aust Citzs - Australian citizens.

Dwg attached Non-dwg - Dwelling attached to a non-residential dwelling (eg shop, office, factory).

Germany (GDR+GFR) - German Democratic Republic and German Federal Republic.

NEI - Not elsewhere included.

N/S - Not stated.

Occupied pte dwellings - Occupied private dwellings.

Tenant - Hse Authy - Tenant of a Government Housing Authority (eg Housing Commission of NSW).
